Education

The Oxford College of Engineering

Bachelor's of Computer Science; CGPA: 8.6

2021 – 2025

Bangalore

Internship Experience

Janitri Innovations

Oct 2025 – Present

QA Testing Intern

Bangalore

- Performed end-to-end testing of **Android, iOS, and web applications**, including a live patient monitoring dashboard used in medical device environments, ensuring reliability and data accuracy.
- Executed **functional, integration, regression, and system testing** for mobile apps and web platforms, validating workflows across application, backend, and device layers.
- Tested integration and performance of connected **medical blender devices**, ensuring seamless data transmission and real-time updates on dashboards.
- Designed and executed **150+ manual test cases** and contributed to automation by building test scripts for Android applications, improving regression coverage by approximately **25%**.
- Implemented a lightweight **API + UI validation framework** where test data (e.g., patient creation) was injected via APIs and verified on UI dashboards, reducing repetitive manual effort.
- Performed **API testing** using Postman to validate data integrity, response accuracy, and error handling between mobile apps and backend services.
- Conducted compatibility testing across **tablets, mobile devices, OS versions, and varying network speeds** (3G-WiFi) to ensure application stability in real-world conditions.
- Identified, logged, and tracked **defects** using **ClickUp**, collaborating with developers for timely fixes and verification.
- Actively participated in **User Acceptance Testing (UAT)**, validating business requirements with stakeholders before production releases.
- Contributed ideas for **feature enhancements and usability improvements**, helping improve overall user experience for clinicians and monitoring staff.
- Engaged in Agile ceremonies including **requirement analysis, daily stand-ups, sprint reviews, and retrospectives**.

Projects

Janitri for Hospitals & Janitri for Mothers (Mobile & Web Testing)

- Performed functional, integration, regression, and performance testing for Android, iOS, and web applications used for real-time patient monitoring, including the central dashboard (dash.janitri.in).
- Validated medical device integration, APIs, tablet compatibility, varying network conditions, UAT workflows, and tracked defects using ClickUp.

Next-Gen Interview Simulator with Facial Tracking and Answer Insights (Testing)

- Conducted functional and integration testing of an interview simulation platform, validating NLP outputs, video transcription accuracy, dashboard analytics, and backend stability under concurrent usage.

Converse Website Testing

- Executed end-to-end functional, regression, compatibility, and exploratory testing of Converse.com, including test case creation, defect tracking in Jira, Selenium-TestNG automation, and API validation using Postman.

Technical Skills

- Testing Skills:** SDLC, STLC, Smoke testing, Regression Testing, Compatibility Testing, Adhoc Testing, Exploratory Testing, Performance Testing, Test Case Design, Test Data Management, Test Execution, Defect Lifecycle, Defect reporting
- SQL Skills:** SQL Queries, Joins, Subqueries, DDL, DML, DQL, TCL, DCL, Normalization
- Java/Python Skills:** OOPs, Inheritance, Polymorphism, Abstraction, Encapsulation, Collections, Exception Handling, Overloading, Overriding
- Selenium/Appium Skills:** Selenium, XPath, Locators, Select Class, Actions Class, Frames, Pop-ups, TestNG, Page Object Model (POM)
- Tools:** Jira, VS Code, Eclipse, FireFlink, Figma, Adobe XD, GitHub, ClickUp, Copilot, MS Office suite
- Soft Skills:** Communication, Collaboration in Agile/Scrum Environment, Problem-Solving, Leadership
